

MEDSTOR

AUSTRALIA'S LEADING HEALTHCARE
STORAGE SOLUTION SPECIALISTS

MAXIMUM SPACE UTILISATION

WORKING WITH YOU – EVERY STEP OF THE WAY

Consulting

We offer a no-obligation, design and consultancy service to our clients by either a site visit or email communication.

Planning

Following our site survey, the information gathered along with your storage requirements are put forward to our design team for planning.

Design and Estimating

Our service enables Medstor Australia to offer you personalised layout plans in detailed CAD drawing format, showing the exact products and equipment included in your itemised quotation. Medstor Australia's unique modular storage system provides solutions for every area of the healthcare environment, from a single room to a complete hospital.

Installation and Implementation

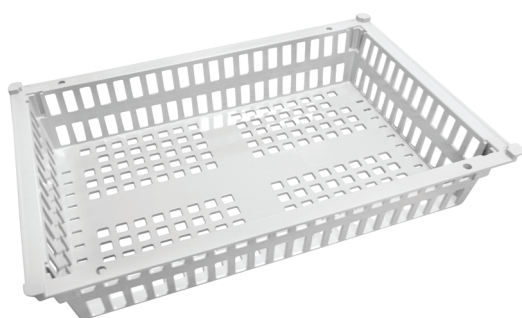

With Medstor Australia you have a partner who will work with you from the initial discussions right through to installation. Our team will liaise with you to make sure that your Healthcare Storage Solutions are delivered on time to an agreed schedule.

Trays, Baskets and Dividers

Medstor trays and ABS baskets are universally acknowledged as the best in their class. They conform to the international module size of 600mm x 400mm and are ISO 9001-2000 compliant. The trays, baskets and dividers are injection moulded in either tough clear polycarbonate or ABS and are ideally suited to the rigours of a busy hospital. They are lightweight, extremely strong and user friendly. They will not snag or damage contents. They are hygienic, can withstand prolonged high temperature machine washing and are resistant to standard detergents. The ease of simple slot dividers allow the trays and baskets to be compartmentalised both length-wise and width-wise to accommodate all materials stored. Layout changes are very easy and can be made in seconds.

Conform to Euro size 600x400mm
– ISO 9001-2000 Compliant

BASKETS

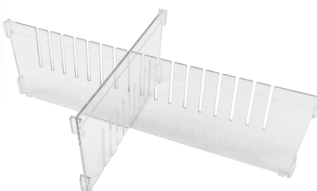

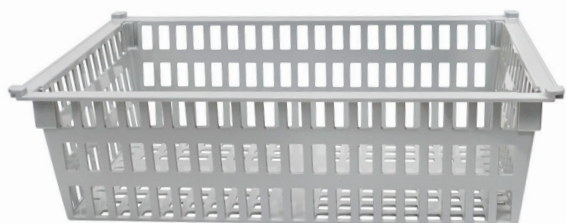

Model No. MM601
Description Basket

Dimensions 600 x 400 x 100mm

CATHETER STORAGE

Medstor Australia's extensive range of Catheter storage solutions provide an effective and practical method of storage for hospitals and healthcare facilities, including:

- Catheter cabinets
- Catheter bins
- Catheter trolleys
- Mobile Catheter racks

Each option provides the ultimate in flexibility to suit your storage needs.

Purpose-made units are our specialty

MEDSTOR CABINETS

For the space-saving storage of Medstor Australia's range of trays and baskets, cabinets can be supplied complete with either plastic liners or telescopic runners. The cabinets are constructed from high quality, 18mm thick Melamine moisture resistant board. These robust units offer the ultimate in space utilisation.

PHARMACY STORAGE

Medstor offers a full range of Pharmacy specific shelving solutions to suit all requirements.

We can offer either free-standing units with the ability to add on bays or lockable cabinets to securely house all Pharmacy Imprest items.

Our comprehensive range of Pharmacy storage units is the perfect solution for whatever your space requirements are.

LABELLING & PRODUCT IDENTIFICATION

Labelling is an important aspect for an active Material Management system. Medstor offers a range of no fuss Label Holders to suit our full range of trays and baskets. The Medstor system offers various options, with insert cards also available.

MODEL	DESCRIPTION
M400/M440	To suit 400mm Facing Trays & Baskets
M600/M660	To suit 600mm Facing Trays & Baskets
CH100	Card Holders with insert to suit all applications

TROLLEYS & CARTS

Medstor Australia offers a comprehensive range of Ward and General Trolleys either our standard models or custom designed if required.

All our trolleys have been designed to accept our Trays and Baskets and are fitted with Telescopic runners to improve accessibility to your products.

For our full comprehensive range of trolleys and carts, please visit our website www.medstor.com.au or contact us.
